

STUDENT'S RIGHT AND WELFARE

I believe that no one should be left behind in this new online learning environment.

To correspond to the dynamic of new normal, an academic platform of peer tutoring would be initiated to provide academical help. A summer school programme on semester break to provide necessary preparation for future semesters, students can reinforce resit and repeat subjects.

A centralized complaint platform is needed to ensure complaints across campuses can be heard instantly by decision makers.

A town hall session between student leaders and students to facilitate better understanding and empathy of current students' problems.

SAFE & INCLUSIVE CAMPUS

I believe that every voice matters, even the smallest one or the unique ones.

To voice out against any injustices faced by students, with no discrimination on nationality, race, sexual orientation & identity and faith.

To provide protection against any form of sexual harassment through the campaign for the management's commitment on protection.

To popularize and enhance currently available mental health hotlines, as to ensure the wellbeing of students.

To uphold the priority of accessibility for people with disabilities. To uphold the freedom and rights for students to affirm their gender and sexual orientation, as well as students' freedom of expression.

FINANCIAL BURDEN MITIGATION

I believe that financial burden should not be the limiting factor of excellence.

To provide sustainable targeted financial relief and immediate response fund to aid students in time of crisis; without the delay of bureaucracy.

To ensure every hike of tuition fees is justifiable, reasonable and accountable.

PROGRESSIVE & DYNAMIC STUDENT'S INVOLVEMENT

I believe that students' participation in nation-building and solving local social problems is imperative, as per the responsibility of varsity students. Students should be solving social problems, not only business problems.

To encourage the proactive participation of students in the nation-building process by responding to pressing issues in our country.

To increase students' involvement in solving social problems by initializing various projects such as policy-making initiative, volunteering work and hackathons.

To provide upskilling and learning programmes through various conferences, training courses and talks.

POST-COVID CAMPUS LIFE REINTEGRATION

I believe that the post-pandemic new normals are very hard to adapt to, therefore help and support is needed for campus life reintegration.

To create a special task force to oversee and facilitate the reintegration of students into post-pandemic campus life.

To assist in adapting physical classes by providing orientation to the new and old students.

To revitalize the long lost wonderful campus life by exploring special collaboration between clubs and societies.
